Welcome to the PFE Medical 2018/19 Product Catalogue! Working with endoscopy and medical units for over a decade, our product range has continued to develop and grow, as we have listened to the changing needs and demands of our customers.

Listed in this catalogue are the current products we have at the time of going to print, however, based on experience, we know that there will very soon be even more products in our portfolio that may be useful to your unit.

So, if you are looking for a product to meet a specific need, but can’t find it in this catalogue, it doesn’t mean we can’t supply it. We ask you to refer to our website or contact us directly and we will do our best to find the product you need.
PRODUCT CODES

Our tailored list of products and codes can be found below, get in touch with us if you need further information regarding specific products or any general enquiries.

For more information on specific products, please find this below.
**Bonvisi**

Fluid management system for TURP (Transurethral Resection of the Prostate) and TURB (Transurethral Resection of Bladder) procedures.

**AE1**

Antigermix E1 is an automaton performing a High Level Disinfection of Transoesophageal ultrasound transducers. The process is based on UVC radiation. It’s an alternative to chemical process.

**AS1**

Healthcare professionals can easily and systematically perform a high-level disinfection of external, endovaginal and endorectal ultrasound probes, between two consecutive patients without a break (automated disinfection step and user-friendly interface).

**TMM6**

Power-driven stretcher chair for easy transport of patients (up to 35 stone).

**Bonvisi**

Fluid management system for TURP (Transurethral Resection of the Prostate) and TURB (Transurethral Resection of Bladder) procedures.
Quartz Glass Shelf
Replacement shelves for the AE1.

RFID Tag
1 tag used per endoscope or probe to ensure full traceability of your medical device.

Sticky Printer Labels
Available in two sizes (small/large) - used for traceability.

Universal ENT Hanger
Safely holds the nasendoscopes vertically, within the AE1, for disinfection. This device is universal to all endoscopes and must be replaced every 100 cycles.
